

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-2. (Canceled).

Claim 3. (Currently Amended) The method of Claim ~~[[2]]~~ 49, wherein said converting step includes identifying a file that is not convertible as an exception further comprising:

~~exporting one of said appended image file and said selected text file.~~

Claim 4. (Currently Amended) The method of Claim ~~[[2]]~~ 49, further comprising a step of:

~~displaying one of said steps of accessing, transferring, tagging, processing, selecting, and converting~~ summary statistics prior to said outputting step.

Claim 5. (Currently Amended) The method of Claim 4, wherein said step of displaying comprises:

displaying a series of parent-child relationships between a file and an attachment to said file said parent-child relationship being a document context.

Claim 6. (Currently Amended) The method of Claim 5, wherein at least said ~~attachment comprises:~~

~~a second attachment attached to said attachment~~ converting step is a step performed in a software plug-in module.

Claim 7. (Currently Amended) The method of Claim [[2]] 49, wherein said ~~folder~~ metadata comprises:

date created, last date opened, last date modified, creator name, matter name, and predetermined identification and quality control data.

Claim 8. (Currently Amended) The method of Claim [[2]] 49, ~~wherein said step of~~ ~~processing~~ further ~~comprises~~ comprising: identifying a duplication within said working copy of the data electronic folder.

Claim 9. (Currently Amended) The method of Claim [[2]] 49, wherein said step of ~~processing~~ converting further comprises: marking a file that cannot be converted as an exception file.

Claim 10. (Currently Amended) The method of Claim [[2]] 49, wherein said step of ~~transferring~~ physically loading and copying comprises:

transferring via a drag-and-drop user interface comprising one of a computer mouse and a pointing device.

Claim 11. (Currently Amended) The method of Claim [[2]] 49, wherein said working ~~electronic folder~~ copy comprises:

a time-stamped audit file configured to record a file history spanning file creation to file destruction.

Claim 12. (Currently Amended) The method of Claim [[2]] 49, ~~wherein said step of~~ ~~processing~~ further ~~comprises~~ comprising at least one of:

checking a file for a virus;  
removing said virus from said file;  
checking said file for encoding or encryption; and  
decoding or decrypting said file.

Claim 13. (Currently Amended) The method of Claim ~~[[2]]~~ 12, ~~wherein said step of~~  
~~processing further comprises~~ comprising:  
performing page ~~estimation~~ counts and time stamping/digital authentication of said  
~~electronic folder~~ output file.

Claim 14. (Previously Presented) The method of Claim 8, wherein said step of  
identifying a duplication comprises:  
identifying said duplication by a hash or another unique identifier.

Claim 15. (Currently Amended) The method of Claim 9, wherein said file that cannot  
be ~~processed~~ converted comprises one of:

a file with a virus;  
an encrypted file;  
a corrupted file;  
an unknown file-type; and  
a deselected file.

Claim 16. (Previously Presented) The method of Claim 9, wherein said step of  
marking a file that cannot be converted comprises one of:

logging said exception file; and

exporting said exception file.

Claim 17. (Currently Amended) The method of Claim 8, wherein said step of identifying a duplication comprises:

identifying a duplication by ~~an MD5~~ a hash algorithm.

Claim 18. (Currently Amended) The method of Claim 8, wherein said step of identifying a duplication comprises:

checking a duplicate file for a file corruption; and

~~deleting or~~ exporting a corrupted duplicate file.

Claim 19. (Currently Amended) The method of Claim ~~[[2]]~~ 49, wherein said step of converting comprises ~~one of~~:

time stamping and digitally authenticating both ~~[[the]]~~ an image and ~~[[the]]~~ a file of extracted meta-data.

Claim 20. (Currently Amended) The method of Claim ~~[[2]]~~ 49, wherein said step of converting comprises one of:

~~creating a searchable single master text file containing the contents of all selected files;~~

time stamping or digitally authenticating the ~~searchable master text~~ output file; and

appending selected meta-data ~~about the files included in the master text file.~~

Claim 21. (Currently Amended) The method of Claim 20, wherein said step of ~~creating a single searchable master text file~~ converting comprises:

creating one or more searchable subordinate text files containing the contents of an operator-selected subset of the selected files;

time stamping or digitally authenticating the one or more subordinate text files; and  
appending selected meta-data about the files included in the subordinate text files.

Claim 22. (Currently Amended) The method of Claim [[2]] 49, ~~wherein said step of extracting selected file meta-data comprises~~ further comprising:

extracting one of file content data, content header information, file meta-data, file type information, and file characteristic data.

Claim 23. (Currently Amended) The method of Claim [[2]] 49, wherein said ~~selected file~~ associated meta-data comprises:

predetermined categories of meta-data corresponding to a file-type.

Claim 24. (Previously Presented) The method of Claim 19, wherein said step of time stamping comprises:

time stamping with one of UTC time and another predetermined time zone.

Claim 25. (Currently Amended) The method of Claim [[2]] 49, wherein said step of extracting ~~only the subset of~~ text comprises:

creating an ASCII file of said subset of text.

Claim 26. (Currently Amended) The method of Claim 25, wherein said step of extracting ~~only the subset of~~ text further comprises:

converting said image of said selected file to text with an OCR program if an ASCII file cannot be created.

Claim 27. (Currently Amended) The method of Claim [[2]] 49, wherein said step of extracting ~~only the subset of~~ text comprises:

searching for a key word.

Claim 28. (Currently Amended) The method of Claim [[2]] 49, wherein said step of extracting ~~only the subset of~~ text comprises:

extracting a portion of text around said keyword.

Claim 29. (Currently Amended) The method of Claim [[2]] 49, wherein said step of processing and converting comprises:

processing with a prioritization scheme keyed to file type.

Claim 30. (Currently Amended) The method of Claim 29, wherein said step of processing with a prioritization scheme comprises:

processing by one of file extension and file header with a plug-in module.

Claim 31. (Previously Presented) The method of Claim 30, wherein said step of processing with a plug-in module comprises:

processing with a plug-in module configured to be selected to be 'ON' or 'OFF.'

Claim 32. (Previously Presented) The method of Claim 30, wherein said step of processing with a plug-in module comprises;

processing with a plug-in module configured to have a user-selectable priority.

Claim 33. (Previously Presented) The method of Claim 29, wherein said step of processing with a prioritization scheme keyed to file type comprises at least one of:

identifying a file type extension; and  
evaluating a binary file header.

Claim 34. (Previously Presented) The method of Claim 33, wherein said step of processing with a prioritization scheme keyed to file type comprises one of:

identifying said file type extension and evaluating the binary header when the file type extension is unknown; and

evaluating the binary header, and if there is a conflict between the binary header and the file-type extension, one of the binary header or the file-type extension is considered a default first choice, either arbitrarily or based on a predetermined logic keyed to a predetermined file type.

Claim 35. (Previously Presented) The method of Claim 30, wherein said step of processing with a plug-in module comprises one of:

processing with a plug-in configured to open multiple file types;  
processing with multiple plug-ins configured to open a single file-type;  
processing with a plug-in created by incorporating a library of a commercially available software product; and  
processing with a plug-in comprising a library of programming code that incorporates functionality of a third party library or an application to load, image and extract metadata from a document.

Claim 36. (Currently Amended) The method of Claim 29, wherein said step of processing with a prioritization scheme keyed to file type comprises:

reading a file that is ~~[[not]] correlated to a plug-in or a file that cannot be read by a plug-in with an AutoVue plug-in.~~

Claim 37. (Currently Amended) The method of Claim 36, wherein said step of processing with a prioritization scheme keyed to a file type comprises:

reading a file that cannot be processed by the ~~AutoVue~~ plug-in by using a Microsoft Windows File Type Association and accessing a Windows registry to determine if a "print" verb is associated with the extension in ~~windows~~Windows;

if said "print" verb is found to be associated with the extension, starting a new Windows process with said "print" verb as startup information and feeding the output of said new Windows process to an imaging print driver.

Claim 38. (Currently Amended) The method of Claim ~~[[2]]~~ 49, wherein said step of ~~creating an image of said selected file~~ converting comprises:

imaging with a ~~TIFFing driver~~an imaging driver.

Claim 39. (Currently Amended) The method of Claim 3, wherein said step of ~~exporting~~ outputting comprises:

exporting to at least one of an image viewer, a printer, ~~[[and]]~~ a computer and another media configured to search the corresponding meta-data or a master file text content.

Claim 40. (Currently Amended) The method of Claim 39, wherein said step of ~~exporting~~ outputting comprises:

exporting ~~[[a]]~~ the output file comprising a predetermined litigation support software file type.

Claim 41. (Currently Amended) The method of Claim ~~[[30]]~~ 40, wherein said predetermined litigation support software file type comprises one of:

an IPRO file type, an Opticon file type, a Concordance file type, a Summation file type, a Ringtail file type, a Microsoft Access file type, and ~~[[a]]~~ other data management file ~~[[type]]~~ types.

Claims 42-43. (Canceled).

Claim 44. (Currently Amended) The method of Claim ~~[[2]]~~ 49, ~~wherein said step of pre-filtering comprises~~ further comprising:

pre-filtering and saving ~~said~~ pre-filtering criteria.

Claim 45. (Currently Amended) The method of Claim ~~[[2]]~~ 49, wherein said step of ~~accessing~~ physically loading and copying comprises:

accessing data from an email or instant messaging archive.

Claim 46. (Currently Amended) The method of Claim 45, wherein said step of accessing data from an email or instant message archive comprises:

accessing a printable attachment of an email or instant message.

Claims 47-48. (Canceled).

Claim 49. (New) A method of processing and converting electronically-stored data for electronic discovery in support of litigation, comprising:

physically loading and copying data and associated meta-data from one or more data storage devices located at a user-site;

receiving on-site user input for subsequent processing of a working copy of the data and associated meta-data, said subsequent processing including storing in a local storage device said data and associated meta-data as the working copy, while maintaining a document context with respect to other documents;

converting a selected file if said selected file is convertible to a user-specified format, said step of converting including

extracting and saving file meta-data associated with said selected file,

extracting text from said selected file,

creating an image of said selected file,

processing and converting the selected file to an output file in the user-specified export format, and

outputting the output file in the user-specified export format for at least one of exporting, reviewing and searching the output file in an external system.

Claim 50. (New) A system for processing and converting electronically-stored data for electronic discovery in support of litigation, comprising:

a data input device configured to allow a user to physically load and copy data and associated meta-data from one or more data storage devices located at a user-site;

an interface configured to receive on-site user input for subsequently processing of a working copy of the data and associated meta-data;

a processor configured to store in a local storage device said data and associated meta-data as the working copy, while maintaining a document context with respect to the other documents, said processor also configured to convert a selected file if said selected file is convertible to a user-specified format, said converting including extracting and saving file meta-data associated with said selected file, extracting text from said selected file, creating an image of said selected file, and

processing and converting the selected file to an output file in the user-specified export format, and an output mechanism configured to output the output file in the user-specified export format for at least one of exporting, reviewing and searching the output file in an external system.

Claim 51. (New) A computer program product including instructions configured to control a computer so as to process and convert electronically-stored data for electronic discovery in support of litigation, when instructions of said computer program product are executed by said computer, said computer is caused to perform a process comprising:

physically loading and copying data and associated meta-data from one or more data storage devices located at a user-site;

receiving on-site user input for subsequent processing of a working copy of the data and associated meta-data, said subsequent processing including

storing in a local storage device said data and associated meta-data as the working copy, while maintaining a document context with respect to other documents;

converting a selected file if said selected file is convertible to a user-specified format, said step of converting including

extracting and saving file meta-data associated with said selected file,  
extracting text from said selected file,  
creating an image of said selected file,  
processing and converting the selected file to an output file in the user-specified  
export format, and  
outputting the output file in the user-specified export format for at least one of  
exporting, reviewing and searching the output file in an external system.
